

Happy Haven

Happy School Communities

Inclusive Programming

I have worked alongside Nick and Jamie from Happy Haven towards the Inclusion and support on the children in their care for the last year. In that time, they have worked hard to ensure all the children in their care have a positive and worthwhile experience. The educators within the service have a confident attitude towards children with additional needs, and this is a testament to the management of the service. The team at Happy Haven OSHC strive towards improvement, and attend regular training sessions, as well as creating strong partnerships with their families, the outside community and support organisations. The children enjoy their time in the service, and embrace their peers with additional needs. It is a place of inclusion and belonging for children.
